## Sharp Tip Thermocouple with Coil Cord A6B Series

This tire probe is a grounded thermocouple located at the tip of a sharp-pointed stainless steel probe. The 0.040" diameter by 0.1" long probe is rigidly bonded to the plastic handle. Penetration is automatically limited to 1/8 inch maximum by the 1/4 inch diameter stainless steel shoulder. Response times of about one second are easily obtained by this probe. All probe assemblies come fully assembled with a plastic handle, stress relief spring, 12" of retractable extension lead and a miniature male 2-prong connector.

*Monitor the temperature of semisoft materials such as: tires, plastics, food, etc.*
